

# KUJE AREA COUNCIL

FEDERAL CAPITAL TERRITORY, ABUJA - NIGERIA

## COMPREHENSIVE STRATEGIC ACTION PLAN

FOR CITIZENS DEVELOPMENT & INSTITUTIONAL EXCELLENCE

2025 - 2030 PLANNING FRAMEWORK

**Prepared by: Action Plan Drafting Committee**

Document Reference: KAC-SP-2026-001 | Date: March 2026

## KUJE AREA COUNCIL BLUE PRINT

## SECTION 1: EXECUTIVE OVERVIEW AND PROFILE

Kuje Area Council is one of six Area Councils in the Federal Capital Territory (FCT), Abuja, Nigeria. Covering a land mass of approximately 1,644 km<sup>2</sup> - about 22.5% of the total FCT land mass - it is the largest area council in the FCT by land area. With a population exceeding 97,000 (2006 census, now estimated higher), Kuje is commonly called the 'Food Basket of Abuja' due to its vast farmland, greenery, and agricultural potential.

|                  |                             |          |                     |                      |
|------------------|-----------------------------|----------|---------------------|----------------------|
| <b>Key Facts</b> | Land: 1,644 km <sup>2</sup> | 10 Wards | Postal Code: 903101 | Food Basket of Abuja |
|------------------|-----------------------------|----------|---------------------|----------------------|

|                           |                     |                      |                   |                   |
|---------------------------|---------------------|----------------------|-------------------|-------------------|
| <b>Strategic Location</b> | Near Centenary City | Close to the Airport | West of Abuja CBD | Developing Suburb |
|---------------------------|---------------------|----------------------|-------------------|-------------------|

Kuje is currently a developing area with informal settlements, mixed road conditions, expanding residential projects, and enormous untapped economic and agricultural potential. The current Executive Chairman is Hon. Samuel Danjuma Shekwolo (APC), re-elected in the February 2026 FCT Area Council elections. Traditionally, the area is led by the Gomo of Kuje. The council operates under the oversight of the Federal Capital Territory Administration (FCTA) and is distinct from state-level LGAs across Nigeria.

### 1.1 Strategic Vision Statement

*To transform Kuje Area Council into a model sub-national government unit - safe, prosperous, educated, healthy, and economically vibrant - by 2030.*

## SECTION 2: EXISTING CHALLENGES - DIAGNOSIS

Before deploying any action plan, a council planner must understand what is broken. Below are the critical challenges identified across all sectors:

| Sector                | Core Challenges                                                                                                                                                        | Severity |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Education             | Inadequate classrooms, lack of ICT tools, low teacher motivation, high dropout rates, and limited secondary schools in rural wards                                     | HIGH     |
| Infrastructure        | Impassable, potholed dirt roads in residential areas, inadequate drainage, lack of clean water, poor sanitation, illegal structures                                    | CRITICAL |
| Health                | Few functioning primary healthcare centres (PHCs) lack specialists, drug stockouts, women farmers have no access to healthcare financing                               | HIGH     |
| Revenue Generation    | Narrow IGR base, underdeveloped tax collection systems, informal market economy, poor land title documentation                                                         | HIGH     |
| Agriculture           | Agricultural land degradation (gully erosion), no access to formal credit for farmers, poor food preservation methods, and market access challenges                    | CRITICAL |
| Hospitality & Tourism | No organised hospitality infrastructure, underdeveloped tourism sites, and low investor confidence                                                                     | MEDIUM   |
| Sports Facilities     | Absence of standard sports facilities across 10 wards, no talent development pipeline, no sports policy                                                                | MEDIUM   |
| Staff Welfare         | Low staff morale, delayed salaries, inadequate training, poor working conditions, limited career progression, and pending arrears                                      | HIGH     |
| Vocational Training   | No dedicated vocational/technical training center in the council, youth unemployment, and skills gap                                                                   | HIGH     |
| Security              | Terrorist attack on Kuje Custodial Centre (2022), demolition of illegal structures tied to security threats, banditry in rural fringes, and lack of community policing | CRITICAL |

## **SECTION 3: KEY DEVELOPMENT DRIVERS**

---

These are the enabling factors - both existing and potential - that can accelerate transformation in the Kuje Area Council:

### **3.1 Natural & Geographic Drivers**

- Largest land mass in FCT (1,644 km<sup>2</sup>) - enormous potential for agriculture, housing, and eco-tourism
- Proximity to Nnamdi Azikiwe International Airport - logistics, hospitality, and investment edge
- Proximity to Centenary City - spillover development, real estate appreciation, new businesses
- Rich farmland and greenery - the original 'Food Basket of Abuja' competitive advantage
- Climate suitable for year-round farming (annual precipitation: 1,250mm, temp avg 30°C)

### **3.2 Institutional & Governance Drivers**

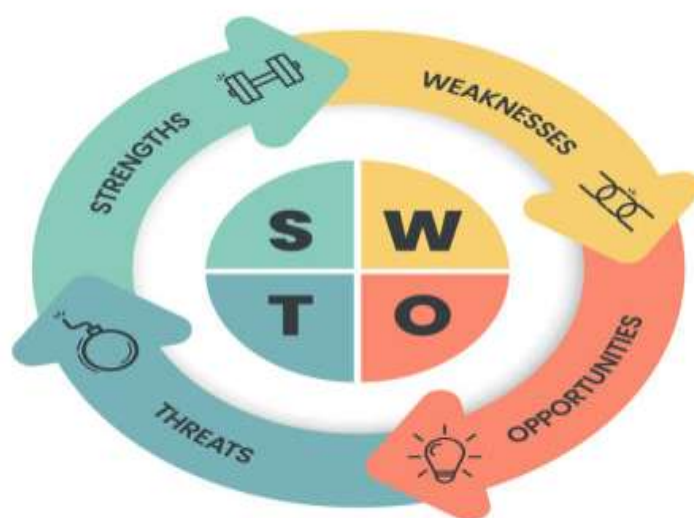

- Direct federal funding - unlike state LGAs, FCT councils receive statutory federal allocations
- FCT Minister (Ezenwo Nyesom Wike) is actively engaging area councils - access to federal infrastructure investment
- FCTA resolve to improve infrastructure in Kuje - political will is present
- Freshly re-elected leadership (February 2026) - mandate for a clear 4-year development agenda
- Traditional governance (Gomo of Kuje, Sa Rubochi, and Agabe of Gwargwada) - cultural legitimacy for community mobilisation

### **3.3 Economic & Social Drivers**

- Growing population and urbanisation - expanding demand for services and housing
- Strategic position as an affordable residential alternative to the main Abuja - investor magnet
- Established market economy - roadside stores, petrol stations, a busy market city
- Diaspora and private sector interest in Abuja sub-urban development
- Youth population - potential workforce for agriculture, vocational skills, and technology

## SECTION 4: SUMMARY OF STRENGTHS, WEAKNESSES, OPPORTUNITY AND THREATS (SWOT)

---

| INTERNAL STRENGTHS                                                                                                                         | EXTERNAL OPPORTUNITY                                                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Grassroots Proximity:</b> Interact directly with citizens, making it easier to understand real needs like water, healthcare, and roads. | <b>Partnerships:</b> Collaboration with NGOs, the private sector, agencies and organisations.                                                                                       |
| <b>Local knowledge &amp; culture:</b> Awareness of cultural, social, and economic conditions in the area.                                  | <b>Technology adoption:</b> Use of digital tools for governance, tax collection, and communication.                                                                                 |
| <b>Potential for participation:</b> Easier to involve the people in decision-making.                                                       | <b>Economic development:</b> Promotion of local businesses, agriculture, and markets.                                                                                               |
| <b>Administrative structure:</b> Established departments for education, works, health, etc.                                                | <b>Community engagement</b><br>Increased citizen participation can improve governance and accountability.<br><b>Youth empowerment:</b> Youth can drive innovation and local growth. |

| WEAKNESSES                                                                                                                                     | THREATS                                                                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Limited funding:</b> Dependence on higher levels of government for financial resources.                                                     | <b>Insecurity and social unrest:</b> Violence disrupts livelihoods and access to services.          |
| <b>Poor management and corruption:</b> Misuse of funds and weak accountability systems.                                                        | <b>Poverty and unemployment</b> Limits citizens' ability to pay taxes or participate in governance. |
| <b>Low staff capacity:</b> Inadequate training and a shortage of skilled personnel reduce the quality of services like education, health, etc. | <b>Political interference:</b> Leaders may prioritize politics over people's needs.                 |
| <b>Poor service delivery:</b> Delays or poor quality in providing basic services such as healthcare, clean water, sanitation, etc.             | <b>Climate challenges:</b> Flooding and drought affect farmers and food security.                   |
| <b>Weak citizen engagement:</b> People are rarely involved in decisions affecting their lives.                                                 | <b>Loss of trust in government:</b> Leads to apathy and low civic participation.                    |

## SECTION 5: SECTOR STRATEGIC ACTION PLAN

Each sector below contains: the challenge diagnosis, strategic goal, immediate actions (3-12 months), and long-term actions (1-3 years).

| ACTION PLANS FOR SOCIO-ECONOMIC DEVELOPMENT POLICIES AND PROGRAMMES |                                                |                                                     |                          |      |      |      |         |           |

|          | 3                                       | Establish apprenticeship frameworks with major construction, manufacturing, and tech firms in Abuja                 | Dec |       |  |  |  | Immediate |
|          | 4                                       | Launch immediate 3-month skill bootcamps: welding, tailoring, phone repair, carpentry, and solar panel installation |     | Feb   |  |  |  | Immediate |
|          | 5                                       | Introduce digital skills training: graphic design, digital marketing, content creation, and basic coding            |     | Feb   |  |  |  | Immediate |
|          | 6                                       | Launch agro-vocational programmes: food processing, fish farming, poultry management, and greenhouse farming        |     | March |  |  |  | Immediate |
|          | 7                                       | Create a register of Kuje's master craftsmen who can serve as volunteer/paid instructors                            | Dec |       |  |  |  | Immediate |

|          |                 |                                                                                                                     |      |     |  |  |  |  |           |
|----------|-----------------|---------------------------------------------------------------------------------------------------------------------|------|-----|--|--|--|--|-----------|
|          | 8               | Partner with NABTEB, NAPTIP, ITF (Industrial Training Fund), and SMEDAN to begin pilot vocational courses           |      | Jan |  |  |  |  | Immediate |
|          | 9               | Partner with microfinance institutions to provide starter capital grants to KVTC graduates                          |      |     |  |  |  |  | Medium    |
|          | 10              | Create a Kuje Artisan Hub - market stalls and small workshops for KVTC graduates to sell their products             |      |     |  |  |  |  | Medium    |
|          | 11              | Create a Kuje Artisan Export Initiative for handmade goods, processed food, and crafts                              |      |     |  |  |  |  | Medium    |
|          |                 |                                                                                                                     |      |     |  |  |  |  |           |
| <b>L</b> | <b>SECURITY</b> |                                                                                                                     |      |     |  |  |  |  |           |
|          | 1               | Sustain monthly Kuje Security meeting that brings together Police, DSS, Army, Civil Defence, and traditional rulers | Jun  |     |  |  |  |  | Immediate |
|          | 2               | Activate a Kuje Security Intelligence Committee with weekly briefings to the Executive Chairman                     | Jun  |     |  |  |  |  | Immediate |
|          | 3               | Launch a community-based reporting system: WhatsApp hotlines, tip lines, and ward-level security contacts           | July |     |  |  |  |  | Immediate |
|          | 4               | Identify and clear all remaining illegal structures and encampments that pose security risks - with FCTA            |      | Nov |  |  |  |  | Medium    |

|          |                           |                                                                                                                              |      |       |     |  |  |           |
|----------|---------------------------|------------------------------------------------------------------------------------------------------------------------------|------|-------|-----|--|--|-----------|
|          | 5                         | Conduct a security vulnerability mapping of all 10 wards - identifying hotspots and ungoverned spaces                        |      | Oct   |     |  |  | Medium    |
|          | 6                         | Deploy CCTV cameras at Kuje market, motor parks, school entrances, and the custodial centre perimeter                        |      |       | Jan |  |  | Long term |
|          | 7                         | Improve vigilante funding                                                                                                    | July |       |     |  |  | Immediate |
|          | 8                         | Partner with the NPF and local vigilantes to increase police patrol frequency in rural and border wards                      | July |       |     |  |  | Immediate |
|          | 9                         | Create a Kuje Emergency Response Protocol: standard operating procedures for natural disasters, attacks, and civil unrest    | Aug  |       |     |  |  | Immediate |
|          | 10                        | Develop a Kuje Security Masterplan - a classified and open-source strategy combining intelligence, community, and technology | Sept |       |     |  |  | Immediate |
|          | 11                        | Support Police and NSCDC with equipment and mobilities                                                                       |      | Sept  |     |  |  | Medium    |
|          |                           |                                                                                                                              |      |       |     |  |  |           |
| <b>M</b> | <b>REVENUE GENERATION</b> |                                                                                                                              |      |       |     |  |  |           |
|          | 1                         | Conduct an IGR Baseline Audit: document all current revenue sources, collection rates, and leakages                          | Aug  |       |     |  |  | Immediate |
|          | 2                         | Introduce a Point-of-Sale (POS) revenue collection system at Kuje main market and motor parks                                |      | March |     |  |  | Medium    |

|  |    |                                                                                                                |     |       |       |  |        |           |
|--|----|----------------------------------------------------------------------------------------------------------------|-----|-------|-------|--|--------|-----------|
|  | 3  | Introduce digital tax payment platforms - USSD-based for market traders without smartphones                    | Nov |       |       |  |        | Immediate |
|  | 4  | Develop the Kuje Area Council website for its heritage, administrative, and commercial visibility              | Nov |       |       |  |        | Immediate |
|  | 5  | Register all businesses, market stalls, and petrol stations for the Kuje Business Directory                    | Oct |       |       |  |        | Immediate |
|  | 6  | Enforce annual business permit renewals and issue clearance certificates to compliant businesses               | Aug |       |       |  | Annual | Immediate |
|  | 7  | Create a dedicated Revenue Intelligence Unit within the council's finance department                           | Aug |       |       |  |        | Immediate |
|  | 8  | Formalise all motor parks with ticketing systems, levies, and trader associations                              | Aug |       |       |  |        | Immediate |
|  | 9  | Launch a Land Title and Property Documentation Drive - many Kuje properties are unregistered                   | Dec |       |       |  |        | Immediate |
|  | 10 | Develop a Kuje Investor Incentive Package - tax holidays for developers who build schools, hospitals, or roads |     | Feb   |       |  |        | Medium    |
|  | 11 | Partner with private firms to develop and lease out council-owned properties and markets                       |     |       | March |  |        | Long term |
|  | 12 | Identify Solid Mineral sites and partnership structure for revenue generation                                  |     | March |       |  |        | Medium    |

|  |    |                                                               |      |  |  |  |  |           |
|--|----|---------------------------------------------------------------|------|--|--|--|--|-----------|
|  | 13 | Revenue collection structure in FCT (Harmonization of rights) | Sept |  |  |  |  | Immediate |
|  | 14 | Review existing PPP and revenue structure                     | July |  |  |  |  | Immediate |
|  |    |                                                               |      |  |  |  |  |           |
|  |    |                                                               |      |  |  |  |  |           |
|  |    |                                                               |      |  |  |  |  |           |

## SECTION 6: IMPLEMENTATION FRAMEWORK

To achieve good implementation of this blueprint, **members of the Action Plan Drafting Committee should be incorporated into the implementation process and evaluation team** to ensure compliance with the blueprint and drive the vision being planned.

### 6.1 Governance & Accountability Structure

| Level                    | Body                                     | Responsibility                                                   |
|--------------------------|------------------------------------------|------------------------------------------------------------------|
| Level 1 (Political)      | Executive Chairman + Deputy              | Set direction, approve budgets, sign MOUs, engage FCTA/FG        |
| Level 2 (Administrative) | Council Manager + Dept Heads             | Day-to-day implementation, reporting, staff management           |
| Level 3 (Technical)      | 10-Sector Project Teams                  | Execute specific sector action plans, track KPIs, report monthly |
| Level 4 (Community)      | Ward Councillors + Traditional Rulers    | Mobilise citizens, community feedback, ward-level monitoring     |
| Level 5 (External)       | FCTA, Federal MDAs, NGOs, Private Sector | Technical assistance, funding, partnerships, oversight           |

### 6.2 Budget Framework

**Funding Sources: Federal Statutory Allocation, FCTA Infrastructure Grants, IGR Growth, Private Sector PPP, Development Partner Grants (World Bank, UNDP, DFID), Diaspora Bonds**

### 6.3 Quick-Win Actions to Start TODAY

As a strategic planner and administrator, here are 10 things you can begin immediately - without waiting for full budget approval:

| # | Action                                                                        | Who Does It        | Cost    |
|---|-------------------------------------------------------------------------------|--------------------|---------|
| 1 | Convene an All-Heads-of-Department strategic alignment meeting                | Executive Chairman | Zero    |
| 2 | Launch a ward-by-ward data collection drive (education, health, roads, youth) | Council Manager    | Minimal |

|    |                                                                              |                    |          |
|----|------------------------------------------------------------------------------|--------------------|----------|
| 3  | Call a Security Intelligence Summit with Police, DSS, and traditional rulers | Executive Chairman | Zero     |
| 4  | Open a farmers' register and connect them to Bank of Agriculture             | Agric Dept         | Zero     |
| 5  | Begin clearing outstanding staff salary arrears                              | Finance Dept       | Budgeted |
| 6  | Start a Kuje Business Directory with POS payment terminals                   | Revenue Dept       | Low      |
| 7  | Deploy a community WhatsApp security reporting system per ward               | Security Committee | Zero     |
| 8  | Identify a building for temporary Vocational Training pilot classes          | Admin Dept         | Minimal  |
| 9  | Launch the Kuje Inter-Ward Football Tournament to mobilise youth             | Sports Committee   | Low      |
| 10 | Submit an infrastructure grant proposal to FCTA within 30 days               | Planning Dept      | Zero     |

## SECTION 7: MONITORING, EVALUATION & REVIEW

### 7.1 M&E Architecture

- Monthly: Departmental progress reports submitted to Council Manager
- Quarterly: 10-Sector Review Meeting with all project teams - chaired by Executive Chairman
- Annual: Citizens' Town Hall - present progress in all 10 wards publicly
- Annual: Full Strategic Review - assess KPIs, adjust priorities, and publish the Kuje Annual Report

### 7.2 Key Performance Indicators Summary

| Sector                                                         | Primary KPI                                                                                              | 2029 Target                                  |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|----------------------------------------------|
| Education                                                      | Primary school enrolment rate<br>Infrastructure, instructional materials, school kits                    | 95% enrolment interventions                  |
| Civil Infrastructure (roads, drainages, culverts, and bridges) | Roads tarred (km)<br>Graded roads (km)                                                                   | 150 km                                       |
| Portable water Scheme                                          | Maintenance of existing water Scheme and new ones constructed                                            | Each village; borehole                       |
| Electrification                                                | Rural electrification, solar modular system in villages, transformers provision, and community lightning | +60%                                         |
| Markets and parks                                              | Functional water equipped, Review and complete all PPP projects                                          | Kuje Central and satellite markets and parks |
| Health                                                         | Functional PHCs per ward                                                                                 | 1 minimum                                    |
| Revenue                                                        | IGR growth rate                                                                                          | +200%                                        |
| Agriculture                                                    | Farmland rehabilitated (hectares)<br>Subsidized Farm inputs                                              | 5,000 ha<br>Across wards                     |
| Hospitality                                                    | Licensed hospitality businesses                                                                          | 100+                                         |
| Sports                                                         | New sports facilities built<br>Sport competitions                                                        | Dedicated sport centers<br>Across wards      |
| Staff Welfare                                                  | Salary payment regularity                                                                                | 100% on-time                                 |

## 7.3 Risk Register

| Risk                                         | Likelihood | Mitigation                                             |
|----------------------------------------------|------------|--------------------------------------------------------|
| Funding shortfalls from federal allocation   | High       | Diversify IGR; pursue development partner grants       |
| Insecurity disrupting project implementation | Medium     | Integrate security into all sector plans               |
| Political interference in project execution  | Medium     | Publish plans publicly; engage civil society watchdogs |
| Staff resistance to performance management   | Medium     | Involve unions; communicate benefits of reform         |
| Climate shocks affecting agriculture         | High       | Introduce irrigation; promote climate-resilient crops  |
| Data gaps slowing planning decisions         | High       | Start data collection immediately as priority zero     |

## SECTION 8: CONCLUSION

---

Kuje Area Council stands at a pivotal moment. Its vast land, strategic location near Abuja's international airport, proximity to the Centenary City development corridor, and identity as the 'Food Basket of Abuja' give it foundations that few area councils in Nigeria can match. The challenges are real - crumbling roads, insecurity, inadequate schools and hospitals, low revenue, and frustrated staff - but they are solvable with disciplined, phased, evidence-based governance.

This Action Plan is not a wish list. It is a step-by-step operational framework grounded in Kuje's actual conditions. The critical success factors are: political will at the top, data-driven decision making at every level, community trust and participation, and sustained transparency in the use of public resources.

**The people of Kuje deserve a council that works.**

*Start today. Measure tomorrow. Report always.*
